SUMMARY

Senior Backend Engineer with over 8 years of experience specializing in the design of scalable architectures and high-performance APIs. Expert in Node.js and .NET ecosystems, with a strong background in Statistics and Project Management (MSc) for data-driven decision-making. Focus on security, SQL/NoSQL database optimization, and deployment in cloud environments (AWS/Azure).

SOFT SKILLS

- Technical leadership
- cross-functional communication
- Data-driven decision making
- Problem Resolution & Critical Thinking
- Stakeholder Management
- Adaptability & Continuous Learning

LANGUAGES

- Spanish native

PROFESSIONAL CAREER

2022 - Present Application support tier 3 Viaro Networks

- I led the technical design and architecture of critical services for a collections platform, ensuring transactional integrity.
- I optimized APIs and SQL Server queries to improve system response times under high load.
- I established coding standards and technical reviews for support and development teams.

2020 - Present Software engineer Viaro Networks

- [Full Stack .NET Developer] Specialized in the .NET Framework, utilizing modern technologies such as Angular, HTML, SASS, C#, and SQL.
- Focused on delivering secure and reliable code by building robust APIs and user interfaces within a web page management system.
- Worked on back-end solutions using Java 8 to maintain and enhance legacy systems, and developed new features from scratch.
- Consistently leveraged cutting-edge tools, prioritizing security and stability across all development stages

2018 - 2020 Software developer Progrentis

- [R&D Specialist] In charge of research into new continuous improvement tools.
- Developed key projects, including a new reporting engine and infrastructure improvements.
- [Cloud Exposure] Tested different cloud environments such as GCP, AWS, and BigQuery.
- Full Stack Development using the .NET Framework with HTML, CSS, JavaScript, Visual Basic, and SQL

2016 - 2018 Software developer Frelance

- [Full Stack / CRM Developer] Expertise in .NET Framework, specializing in ASP.NET and Visual Basic to develop high-performance solutions.

MSC, ENG. COMPUTER SCIENCE

EDUCATION

Master on Engineering Specialized in Project Management and Statistics

GALILEO UNIVERSITY

- [Project Management Specialist] Advanced training in Project Management, mastering Agile and Traditional (Cascade) methodologies.
- Skilled in applying PMI and IPMA frameworks to ensure project excellence, quality control, and efficient execution.
- [Data-Driven Decision Making] Expertise in advanced Statistical Models to support data-driven decision processes and provide actionable insights.

Engineer in computer science

GALILEO UNIVERSITY

- Graduated with advanced expertise in efficient problem-solving and a strong focus on developing robust digital solutions.
- Skilled in leveraging cutting-edge technologies to address complex challenges while maintaining a commitment to ethical decision-making

CERTIFICATIONS

- FULL STACK OPEN CERTIFICATE (React, Node.js, MongoDB) awarded by the University of Helsinki.
- SCRUM Foundation Professional Certificate (SFPC) awarded by CertiProf.
- Lean Six Sigma White Belt awarded by Management & Strategy Institute

ADDITIONAL SKILLS

- Backend Development: High proficiency in C#, Java, PHP, Node.js (Expertise reinforced by Full Stack Open), and Visual Basic.
- Database Management: Expert knowledge of SQL (SQL Server, Postgres, MySQL). Experienced with MongoDB (Expertise reinforced by Full Stack Open).
- Frontend Development: High proficiency in Angular, React (Expertise reinforced by Full Stack Open), HTML5, CSS, SASS, and Vanilla JavaScript.
- Cloud Computing: Experience with major cloud platforms: AWS, Azure, and Google Cloud.
- API & Version Control: Proficient with Git, GitHub/GitLab. Skilled in creating and maintaining RESTful APIs and working with GraphQL.
- Testing: Experienced with automated testing frameworks (Jest, Mocha, JUnit) and testing strategies (unit, integration, and end-to-end).
- Project Management & Tools: Proficient in Agile and Cascade methodologies. Robust knowledge of team management tools: Jira, Zendesk, Miro, and Microsoft Project.

FREELANCE PROJECTS (2025)

USERS AND CLIENTS CRM APRIL 2025 – MAY 2025

- [Full-Stack Laravel] Successfully developed a functional CRM platform from legacy data, performing comprehensive Data Analysis and Information Modeling to establish a solid database foundation.
- Built a highly dynamic and responsive application focusing on modern UX/UI using the TALL Stack (Tailwind CSS, Alpine.js, Livewire) with Laravel, Blade, and MySQL.

GAS STATION CLIENTS CRM JANUARY 2025 – APRIL 2025

- [Client-Server Development] Delivered a complete client-server application from scratch, managing the entire software development lifecycle (SDLC) based on initial client requirements.
- Technology Stack: Utilized Laravel, Blade, Tailwind, MySQL, and Breeze, showcasing expertise in robust and scalable PHP backend development.
- Focused on an efficient circular development approach, ensuring seamless integration between the database architecture and optimized frontend code.
